

Indira Mahavidyalaya, Kalamb Dist. Yavatmal
DEPARTMENT OF BOTANY
B. Sc. II SEMESTER III
SESSION-2019-20

Remedial Classes

Name of Faculty: Dr. Chetna Ugale

Fill in the Blanks

1. The _____ venation is found in Dicot leaves
2. Bentham and Hooker's system is the type of _____ system of classification.
3. Wedge shaped phloem is found in the _____ stem.
4. Umbel inflorescence is diagnostic feature of family _____.
5. Phloem is _____ conducting tissue.
6. Cruciform corolla is present in the family _____.
7. Apiaceae is characterized by the _____ inflorescence.
8. The entry of pollen tube through micropyle of ovule is called as _____.
9. In *Apiaceae* _____ inflorescence is present.
10. Phloem is _____ conducting tissue.
11. The pollen tube enters in to ovule through _____ is known as Porogamy.
12. Phloem wedges are present in secondary wood of _____ stem.
13. Epicalyx is the characteristic feature of family _____.
14. Xylem is _____ conducting Tissue.
15. Verticillaster inflorescence is the characteristic of family.
16. The Nutritive layer of Anther wall is _____.
17. Wedged shaped phloem is found in _____ stem.
18. Pappus is modified _____.
19. The water conducting tissue is _____.
20. The flower with superior ovary is called _____.
21. Double fertilization is the characteristic feature of _____.
22. _____ is the nutritive layer of Anther.
23. Medullary vascular bundles are present in stem of _____.

24. Brassicaceae is characterized by _____ corolla.
25. The process of nuclear fusion to form zygote is called as _____.
26. Monoadelphous stamens are found in family _____.
27. Wedge shaped phloem is found in _____ stem
28. Verticillaster inflorescence is found in the family _____.
29. Nutritive layer of cells around the pollen sacs in anther is called as _____.
30. Xylem is _____ conducting tissue in plants.
31. Capitulum inflorescence is the characters of family _____.
32. In India Royal Botanical Garden located at _____.
33. Pailionaceous corolla is characteristic of family _____.
34. Lantana camara is an example of family _____.
35. Food conduction tissue in plants is _____.
36. Process of double fertilization and triple fusion is a characteristic of _____.
37. Diadelphous stamens are found in family _____.
38. Umbel inflorescence is characteristic feature of family _____.
39. Wedge shaped phloem is found in _____ stem.
40. When the ovule is straight it is called as _____.
